

IDIC 2026

INTER DISCIPLINARY INTERNATIONAL CONFERENCE (IDIC 2.0) 2026

Circular Economy: Multi-Regional Perspectives to Innovation, Policy and Practice Jointly Organized by **St. Aloysius (Deemed to be University)** Mangalore, Karnataka and **Mar Baselios Christian College of Engineering and Technology**, Peermade, Kerala

March 17 & 18, 2026

Organizing institutions

School of Arts and Humanities
Dept. of Economics, SADU
Dept. of Political Science, SADU
Dept. of Social Work, SADU
Dept. of History, SADU
Dept. of Sociology, SADU
Dept. of Psychology, SADU
Dept. of Media studies & Visual Communication, SADU

School of Engineering
Mar Baselios Christian College of Engineering and Technology, Peermade Kerala
School of Engineering, SADU

School of Business and Management
School of Business and Management SADU

Knowledge partners

Center for Media and Communications Research(CMCR), University Tunku Abdul Rahman Malaysia
(*Open for interested educational institutions and relevant Industry Partners*)

Circular Economy: Multi-Regional Perspectives to Innovation, Policy and Practice

Circular economy initiatives extend beyond profit generation and environmental remediation, encompassing significant social and economic dimensions. Employment generation is frequently identified as one of the most critical contributions of the circular economy. Moreover, circular economy start-ups hold potential as instruments for poverty alleviation by creating sustainable livelihood opportunities. Resource-extractive industries, which constitute the backbone of many economies, are predominantly organized according to the principles of the linear economy. However, in contrast to this approach, a green economy is defined by low carbon intensity, resource efficiency, and social inclusivity. Furthermore, while the notion of circularity emphasizes the continuous cycling and regeneration of resources, the circular economy more specifically is conceptualized as a system in which products and materials are preserved at their highest possible value for the longest duration. Consequently, this model stands in opposition to the traditional linear paradigm, which is based on a 'take–make–consume–dispose' trajectory'.

Scholars increasingly argue that the regeneration and sustainable management of resources, designed to preserve equilibrium between natural systems and human activities, introduce significant challenges for technological innovation, policy development at both global and local
levels, and practical implementation (UNECE,2023). These challenges extend across multiple dimensions, including product design, the identification and responsible use of resources, and the integration of circularity principles into business models. Furthermore, it highlights the need for technical support, as well as strategies to enhance the promotion and visibility of circular economy initiatives through various media platforms. Collectively, these factors underscore the complex and multi-scalar nature of advancing the circular economy.

The conference is designed to explore t he concept of the circular economy across multiple contexts, including Engineering, Science, Business, and Social Sciences. It aims to examine emerging practices and challenges within a technology-driven environment, while also investigating local and global collaborations that support sustainable and technological development. Furthermore, the conference seeks to provide a platform for academicians, researchers and practitioners to share knowledge, enhance professional networking, and foster interdisciplinary research by encouraging integration across diverse academic fields.

Focus of the conference

The conference is designed to explore t he concept of the circular economy across multiple contexts, including Engineering, Science, Business, and Social Sciences. It aims to examine emerging practices and challenges within a technology-driven environment, while also investigating local and global collaborations that support sustainable and technological development. Furthermore, the conference seeks to provide a platform for academicians, researchers and practitioners to share knowledge, enhance professional networking, and foster interdisciplinary research by encouraging integration across diverse academic fields.

Call for papers
Submission of abstract: **15th December 2026**
Intimation of acceptance of full paper: **In 10 day of receiving the abstract**
Submission of full paper: **Jan 15th 2026**
Computer Engineering (Submission of Full paper only): **last date Jan 15th 2026**
Acceptance of paper for presentation: **30th Jan 2026**

Sub Themes

I. Circular Economy & Multidisciplinary Approaches

- Evolving paradigms of circular economy- local, national, global Perceptions.
- Global, National, regional responses to circular economy
- Circular Societies: Indigenous and Traditional Knowledge Systems.
- Circular Economy Liveable Cities: Renewable Energy & Energy efficiency
- Environmental Justice, Circular Economies & Green Living
- Consumer Behaviour and Regulatory Instruments for Circular economy Practices
- Creativity and innovation management for circular economy
- Role of cooperatives in inclusive circular practices
- Multi-regional comparative case studies (India, EU, Africa, Latin America, Asia-Pacific)

2. Circular Economy and Engineering

- Green Power Engineering
- Eco-Conscious Vehicle Technologies
- Resilient Infrastructure Design Sustainable communication system
- Intelligent Biodiversity Monitoring
- Reliable Embedded Validation
- The Energy Transition & Smart Grids Renewable energy forecasting; Grid stability; Demand-response systems.

3. Circular Economy and Agriculture

- Precision Agriculture & Resource Optimization Smart resource management (water, fertilizer); Real-time monitoring
- Climate-Smart Farming & Biodiversity Climate adaptation models; Biodiversity monitoring; Regenerative practices
- Autonomous Systems & Farm Labor Agricultural robotics; Socio-economic impacts; Equitable transition
- Resilient Food Supply Chains Demand forecasting; Waste reduction; Supply chain transparency.
- Global Food Security & Policy Global stress monitoring; AI for smallholder farmers; LLMs for agronomy
- Transforming Agriculture residue into value-added products
- Circular Urban Agriculture and Strategies for Sustainable Food Production in Growing Cities

4. Circularity in Healthcare

- Precision Diagnostics & Personalized Medicine AI in medical imaging; Genomic analysis; Predictive prevention
- Optimizing Healthcare Operations Intelligent patient flow; AI-driven supply chains; Waste reduction
- Public Health & Equitable Access Epidemiological modeling; Supporting at-risk populations; Mitigating bias
- Accelerating Drug Discovery Analyzing biological data; Streamlining clinical trials
- The Sustainable Healthcare Paradox Energy consumption of AI; E-waste; Data privacy and ethics

5. Blue Economy and sustainable development

- Ocean Current Energy
- Undersea Communication Channels and Cables
- Ocean Health and sustainable development
- Climate change and blue economy
- Sustainable coastal livelihoods
- Sustainable Port Development
- Sustainable marine tourism
- Gazani farming/Submerged Food Production Systems/ Seaweed Farming / Aquaculture

6. Business Analytics and Digital Technologies For CE

- Role of AI, IoT, and blockchain in circular supply chains
- Big data for resource optimization and waste reduction
- Predictive analytics for circular business models
- Sustainability performance dashboards and KPIs
- Digital twins and lifecycle data in circular industries

7. Finance, Marketing, Consumer Behavior and Circular Economy

- Green finance, ESG investments, and carbon credits
- Impact of financial institutions in enabling circular transitions
- Microfinance and cooperative models for circular entrepreneurship
- Multi-regional financing frameworks for sustainability
- Branding sustainable and circular products
- Consumer perceptions and eco-conscious buying behavior
- Circular economy in textile and fashion industries
- Service-dominant logic and product-as-a-service models

8. Logistics, Supply Chain Management, and Operations fostering CE

- Reverse logistics and closed-loop supply chains
- Sustainable procurement and supplier collaboration
- Multi-regional models for green logistics
- Lean-agile operations in circular transitions
- Circular strategies in waste and urban logistics management

9. Social, Economic, Political, Ethical, Ecological Issues and Policy Governance

- Public sector interventions in Circular Economy
- Justice, Equity, and Inclusivity in Circular Transitions
- Gender dimensions and community participation in CE initiatives.
- Education, research, and capacity-building for CE workforce development.
- Bio-diversity and Conservation
- Best Practices and Ways Forward for cities to become Circular and livable
- Circular supply chains
- Unintended consequences and rebound effects of CE practices
- Business model innovations & Circular economy
- Corporate sustainability reporting and CE integration in ESG frameworks.
- Sustainable Urbanism & Infrastructure Intelligent traffic management; Smart buildings; Inclusive urban planning.

- The Circular Economy & Manufacturing Predictive maintenance; Waste/recycling optimization; Circular design.
- Advanced Climate Modeling & Accounting Enhancing climate model precision; Real-time carbon tracking.
- Governance, Ethics, & Social Sustainability Mitigating bias; Data privacy; Addressing the digital divide

10.Communication and Circular Economy

- Communication concepts and models for Sustainable development
- Decoding and encoding practices fostering circular economy: Drivers of green economy, advertising discourses, OTT and immersive communication approaches, digital solutions etc.
- Information enhancement versus information overload fostering sustainability
- Innovations in communication for sustainability
- Positive story telling: Media and Communication for learning and positive changes
- Indigenous story telling: Conservation and preservation of Traditional knowledge and practices
- Public Relations and CSR for the circular economy
- Communication policies: Regional, national and international network
- Sustainability and AI - Story telling
- Social media and community-based communication for green economy
- Digital and social media campaigns for circular practices
- Future-oriented media management and communication
- Spirituality of Sustainable communication

Publication

- Abstract book with ISBN will be published
- Blind review of all abstract and full paper will be the process followed to select the abstract and thefull paper for presentation and Publication
- Selected papers will be published in Scopus indexed /WOS Journals

Date of the Conference

March 17, 2026

St.Aloysius (DeemedtobeUniversity) Mangalore, Karnataka

March 18, 2026

MarBaselios Christian Collegeof Engineering and Technology, Peermade Kerala

March 16, 2026 Pre-Conference Workshop

Educational Institutions Contributing to Circular Economy (open to registered participants and others)

Contact:

email id to submit the abstract & for enquiry: idic_2026@staloysius.edu.in
Conference contact: Ms. Savitha D'Souza, SADU, savitha_dsouza@staloysius.edu.in, +91 9481635165:
Dr. Oommen Tharakan, MBCE,+91 9496080065

Mode: Hybrid

Registration

Paper presentation and Participation	Early Bird		Other	
Categories of Participants	2000	50	2500	75
Academicians / Researchers	2500	60	3000	80
Industry	1500	40	2000	50
Research Scholars	1000	25	1500	30
Students	1500	15	1500	15
Only Participation*	500		500	
Only participation students	Indian (INR)	Over sea (USD)	Indian(INR)	Over sea (USD)

**Two days participation in all the sessions in both the venue: Includes Conference kit, working lunch and tea. E- Certificate of participation will be issued for all the participants*

To know more about the conference, visit www.mbccet.in/idic/
To register, visit https://forms.gle/ucEAVXCbdkHsC3Dd9

Patrons

His Holiness Moran Mar Baselios Marthoma Mathews III, Catholicos of the East and Malankara Metropolitan

Rev.Fr. Dionysius Vaz SJ (Chancellor, St Aloysius (Deemed to be University) and Provincial Karnataka Jesuit Province

Co- Patrons

H.G. Zachariah Mar Severius Metropolitan, Idukki and Local Manager, MBCCTE

Rev. Fr. Melwin J Pinto SJ (Pro- Chancellor, St Aloysius (Deemed to be University) and Rector Karnataka Jesuit Province

Rev. Dr. Praveen Martis SJ (Vice Chancellor, St Aloysius (Deemed to be University)

Rev. Dr. Melwyn Dcunha SJ (Pro-Vice Chancellor, St Aloysius (Deemed to be University)

Conference Directors

Dr. Oommen Mammen, Director MBCCTE Peermede

Dr. Jolly Jose, Professor and Chair, Strategic Engagements Research and Innovation- SADU, Mangalore

Conference Co- Directors

Dr. Ruban S, Dean, School of Engineering SADU, Mangalore

Dr. Oommen Tharakan KT, Dean, MBCCTE Peermede

Dr. Rajani Suresh Dean, School of Business and Management SADU, Mangalore

Dr. Rose Veera, Dean, School of Arts and Humanities SADU, Mangalore

Mr. NV Paulose Global TV Online , Mangalore

Editorial Board

Dr. Sharon Wilson, Center for Media and Communications Research(CMCR), University Tunku Abdul Rahman Malaysia

Dr. Sapna. M. S. Director (I/C), EMRC, Professor & Chairperson, DoS in Journalism and Mass Communication, University of Mysore, Karnataka India

Dr P P Sajimon Associate Dean School of Arts Humanities SADU

Dr. Rittin Abraham Kurien, Dept. of Mechanical, Saintgits College of Engineering (Autonomous), Kottayam Kerala,India

Dr Vidya Vinutha D'Souza Assistant Dean, School of Arts Humanities SADU, Karnataka India

Dr. Ranu Tomar, Amity School of Communication Amity University Uttar Pradesh, India

Advisory Board

Dr. Ronald Nazareth, Registrar SADU, Mangalore, Karnataka

Prof.(Dr.) K G Suresh, Director, India Habitat Centre Delhi; Ex VC, MCU; Ex DG, IIMC

Rev. Fr. Viswas Misquith SJ, Finance Officer SADU, Mangalore, Karnataka

Dr. Piyashi Dutta, Lead, Tribal Research and Knowledge Centre(TRKC) New Delhi

Rev. Dr. Kiran Cotha SJ (AIMIT) SADU, Mangalore, Karnataka

Dr. Chandra Shekara Shetty T , Director Research and Development Cell, SADU, Mangalore, Karnataka

Dr Cynthia Lau, Universiti Tunku Abdul Rahman,Malaysia

Dr. Eman Soliman, Associate Professor, Galala University, Egypt

Dr. Biju . K, director research APJ Abdul Kalam Technological University, Trivandrum, Kerala

Dr. Prof. V I George, Principal, MBCCTE Kerala

Dr. Henry Aspeqvist, Former Vice President HR, World Bank. Advisor to the World Bank,
Washington DC

Organizing Committee

Dr. Shaibu VB, MBCCTE Peermede

Dr. Bincy K Jose, MBCCTE Peermede

Dr Mona J Mendonca Dept. of History, SADU,Mangalore

Dr Manohar V Serrao Dept. of Economics, SADU, Mangalore

Dr Joan Rita OBrien Dept. of Sociology, SADU, Mangalore

Dr Shwetha Rasquinha, Dept of Social Work, SADU, Mangalore

Dr Shalini Aiyappa Dept of Psychology, SADU, Mangalore

Dr. Ushus Maria Joseph, MBCCTE Peermede

Ms Bhavya Shetty Dept of Journalism & Visual Communication , SADU, Mangalore

Mr. Mohammed Siraj B, School of Engineering SADU, Mangalore

Mr. Glenson Toney, School of Engineering SADU, Mangalore

Ms Harinakshi, School of Business and Management SADU, Mangalore

Keynote Speakers

Dr. Amena Mahmoud
Associate Professor at Kafrelsheikh University, EGYPT

Dr. Manu Korulla
Director General, DRDO

Dr. Thomas Han
Associate Professor at Stockholm Resilience Centre at Stockholm University
